# U.S.S.R. COMPUTATIONAL MATHEMATICS AND MATHEMATICAL PHYSICS

Cover-to-cover translation of  
*Zhurnal vychislitel'noi matematiki i matematicheskoi fiziki*  
Published bi-monthly by Pergamon Press

## HONORARY EDITORIAL ADVISORY BOARD

R. A. BROOKER ( <i>Manchester</i> )	A. S. HOUSEHOLDER ( <i>Oak Ridge</i> )
L. FOX ( <i>Oxford</i> )	G. F. J. TEMPLE ( <i>Oxford</i> )
D. C. GILLES ( <i>Glasgow</i> )	A. THOM ( <i>Oxford</i> )
J. H. WILKINSON ( <i>N.P.L., Teddington</i> )	

## Scientific Translation Editor:

R. C. Glass, M.A., M.Sc.,  
The City University, St. John Street, London, E.C.1.

Translators: J. Berry and D. E. Brown

## Publishing, Subscription and Advertising Office:

Pergamon Press Ltd., Headington Hill Hall, Oxford, OX3 0BW

1978 Subscription rate \$ 269.50 (including postage and insurance)  
Subscriptions are only serviced after payment has been received and  
are not accepted for less than one year.

Orders should be sent to the Subscription Fulfillment Manager  
Headington Hill Hall, Oxford, OX3 0BW

## Microform Subscriptions and Back Issues

Back issues of all previously published volumes are available in the  
regular editions and on microfilm and microfiche.

Current subscriptions are available on microfiche simultaneously with the  
paper edition and on microfilm on completion of the annual index  
at the end of the subscription year.

# LIST OF CONTENTS

## Number 1

V.A. VINOKUROV	1 Asymptotic error estimates. III
A.G. SUKHAREV	17 Optimal search for the roots of a function satisfying a Lipschitz condition
G.S. GANSHIN	26 Function maximization
A.S. ZIL'BERGLEIT	36 Uniform asymptotic expansions of some definite integrals
L.V. AGAPOVA	44 Stable simultaneous solutions in a class of repetitive games
E.I. VOLYNSKII and M.Z. KHENKIN	57 A search algorithm for solving the general problem of mathematical programming
K.G. VALEEV and O.N. KOSHELEVA	68 Construction of the solution of non-linear difference equations in the neighbourhood of a fixed point
L.T. POZNYAK	78 Application of the Bazley-Fox method to two-dimensional second-order elliptic equations
I.V. FRYAZINOV	95 A difference approximation of problems for an elliptic equation
E.G. SACHKOV	111 Solution by the establishment method of boundary value problems on eigenvalues
G.P. ASTRAKHANTSEV	123 The iterative improvement of eigenvalues
A.V. BABAKOV and L.I. SEVERINOV	132 The stationary variant of the flow method for solving problems of the mechanics of a continuous medium
A.I. BOIKO and V.P. IVANOV	143 Extinction of a field by a system of cylindrical radiators
A.A. KRONBERG	153 Solution of two boundary value problems by the Monte Carlo method
Yu.A. MAMATOV	161 Estimation of the number of functions of the algebra of logic realized by the plane d.n.f.
V.B. ALEKSEEV	180 Deciphering of some classes of monotonic many-valued functions
V.I. ISHCHUK	189 The spectral characteristics of the description matrices of some recognition algorithms
Yu.I. ZHURAVLEV, S.N. MIROSHNIK and S.M. SHVARTIN	198 An approach to optimization in a class of parametric recognition algorithms

## Short Communications

A.I. GREBENNIKOV	208 The choice of nodes in the approximation of functions by splines
------------------	--

E.Yu. ARKHIPOVA	214	The difference Dirichlet problem with discontinuous boundary conditions
A.B. BAKUSHINSKII	219	The stability and maximum domain of convergence of some regularizing algorithms
I.F. DOROFEEV	224	The accuracy of some regularizing algorithms
G.G. ABDULLAEVA	229	The A.N. Tikhonov regularization of the singular Cauchy integral
M.A. SHEPILOV	235	The generalized gradient method for extremal problems
V.F. DEM'YANOV	242	Minimization of a complex function on a plane
Yu.N. ASTAKHOV, Yu.N. KISELEV and A.A. FEDOSEEV	246	The problem of geometrical programming without forced constraints
V.N. FETISOV	252	Bounds of the sample length in the solution of extremal problems by the Monte Carlo method
Yu.D. SHMYGLEVSKII	259	The variational principle in magnetohydrodynamics for infinite conductivity
N.A. STADNIKOVA	264	Calculation of the strained state of an octant under the action of a load concentrated at the apex
	272	Book Review

## Number 2

V.B. GLASKO, G.V. GUSHCHIN and V.I. STAROSTENKO	1	Tikhonov regularization applied to the solution of non-linear systems of equations
V.I. LEBEDEV	10	Quadratures on a sphere
Yu.G. EVTUSHENKO	24	Numerical methods for solving problems of non-linear programming
N.M. NOVIKOVA	42	Two- and three-person games with coupled constraints and a fixed order of moves
B.I. BUTRIM	57	Modified solution of the bargaining problem
A.M. TER-KRIKOROV	68	Convex programming in a space adjoint to a Banach space and convex optimal control problems with phase constraints
A.D. GORBUNOV and V.V. POSPELOV	75	On the solvability and convergence of Adams' methods with an unstable operator
I.R. SAARNII	89	Solution by finite differences of a boundary value problem for a differential equation with deviating argument
D.D. PLAKHOV	102	Computation of Fok's function in the case of wave diffraction at an elastic shell

I.S. SLESAREV and A.M. SIROTKIN	114 Calculation of neutron diffusion by the imbedded elements method
A.V. BOBYLEV and V.A. CHUYANOV	121 On the numerical solution of Landau's kinetic equation
V.Ya. GOL'DIN, V.A. KUZUYUK and A.Kh. RAKHMATULINA	131 Non-linear method of electron transport calculation
N.D. KOPACHEVSKII	140 Application of S.L. Sobolev's method to the problem of the oscillations of an ideal capillary rotating liquid
V.E. NEUVAZHAEV and V.G. YAKOVLEV	154 Numerical gas-dynamical calculation of turbulent mixing of the interface
V.S. KOSTRYKIN, V.N. FOMIN and A.S. KHOLODOV	166 Three-dimensional radiating flow around blunted cones and ellipsoids of revolution
V.V. LARCHENKO	174 Application of an asymptotic method for the numerical integra- tion of singularly perturbed equations
V.N. DIESPEROV and L.A. LOMAKIN	184 Asymptotic properties of the solution of a boundary value problem for the viscous transonic equation
I.S. GUSHCHIN	196 A consecutive regularization method

#### Short Communications

S.A. IVANOV, A.Ya. LEPIN and E.I. LEPINA	210 An approximate method of finding the greatest of the moduli of the roots of a polynomial
V.M. SAFRO	212 The rate of convergence of some gradient methods
I.I. KOCHETOV	215 A new way of choosing the regularization parameter
V.P. TANANA	219 Optimal order methods of solving non-linear ill-posed problems
S.A. KAS'YANYUK	226 Approximation and interpolation by finite spectrum functions
S.G. ANTIMONOV and Yu.P. IVANILOV	233 Solution of an open cooperative characteristic function game
B.N. CHETVERUSHKIN	239 An iterative algorithm for the solution of difference equations
N.S. GRIGOR'EVA	246 Estimation of Green's function of the Helmholtz equation in the shadow region of the three-dimensional case
A.I. DERZHAVINA	248 On the variation-function behaviour in the linearized short-shock problem
V.A. GUSHCHIN	251 Flow of a viscous fluid past three-dimensional bodies
	257 Book Reviews

#### Number 3

V.A. VINOKUROV	3 Integral error estimates — IV
----------------	---------------------------------

A.G. ZARUBIN and M.F. TIUNCHIK	21	Approximate methods for solving a class of non-linear operator equations
A.L. GAPONENKO and Yu.L. GAPONENKO	32	A method of regularization for operator equations of the first kind
E.S. LEVITIN	40	Stability estimates for the solution in an unconstrained optimization problem
A.M. TER-KRIKOROV	51	A discrete Pontryagin maximum principle for linear and convex problems in an infinite time interval
A.A. LEVIKOV	59	Approximation of an optimal control problem by finite difference analogues
T.N. DANIL'CHENKO	70	Principle of the guaranteed result in multistage two-person games with linear pay-off functions
O.N. BONDAREVA	78	Finite approximations for the cores and solution of cooperative games
I.S. MEN'SHIKOV	88	$n$ -Person games with a fixed sequence of moves
Yu.I. MOKIN	94	Stable two-layer schemes on a non-uniform mesh
G.M. VAINIKKO and E.E. TAMME	105	Convergence of a difference method in the problem concerning the periodic solutions of an elliptic equation
E.F. KHANKISHIEV	118	Application of the method of straight lines to the solutions of an elliptic equation with a degeneracy
V.N. MIKHAILOV	133	Solution of the equation of heat conduction in complicated two-dimensional domains
A.S. KALASHNIKOV	141	The effect of absorption on heat propagation in a medium in which the thermal conductivity depends on temperature
N.S. BAKHVALOV, V.S. BONDARENKO, E.P. ZHIDKOV, S.B. RUBIN and S.I. SERDYUKOVA	149	Numerical solution of Maxwell's equations in an inhomogeneous region with a moving discontinuity on the right side
Yu.P. KRASOVSKII and G.G. SHCHEPKIN	157	Asymptotic theory of the electromagnetic field over a stratified medium with high conductivity
A.A. ARSEN'EV	171	The existence of resonance poles and scattering resonances in the case of boundary conditions of the second and third kind
E.D. TERENCEV and Yu.D. SHMYGLEVSKII	178	The complete system of divergent equations of the electromagnetic dynamics of an ideal gas
V.I. ZHUK and V.A. RYKOV	190	Rarefied gas flow from a spherical source for small Knudsen numbers
M.Ya. IVANOV and V.N. KIREEV	201	Calculation of highly underexpanded supersonic free jets

V.V. UCHAIKIN	209 Monte Carlo simulation of particle transport with multiplication
V.P. KOZYREV	218 Finding all the Hamiltonian paths of a graph and investigation of Hamiltonian-connected graphs
<b>Short Communications</b>	
I. GERGEI	225 A method of solving systems of non-linear equations
I.P. RYAZANTSEVA	228 Regularization of non-linear equations with monotonic discontinuous operators
V.N. MALOZEMOV	232 Equalization of maxima
V.A. DAUGAVET	236 Alternance properties of the solutions of non-linear minimax problems with non-linear constraints
M.D. IVANCHEV, I.G. MITEV and N.I. YANEV	241 Realization of the branch and bound method for solving the general mixed integer programming problem
V.E. TROSHCHIEV	246 Types of mesh permitting conservative approximations of a two-dimensional transport operator by a triangular difference operator
F.V. SHUGAEV	251 The motion of shock waves in a gas with variable parameters
Yu.A. EREMIN and A.G. SVESHNIKOV	255 Study of scalar diffraction at a locally inhomogeneous body by a projection method
V.Ya. GOL'DIN and G.A. KUDINOVA	260 Calculation of the radiative energy flux in air
V.V. ALEKSANDROV and G.L. STENCHIKOV	264 Differential approximation of the evolution of plasma noise
	270 Book Reviews

#### Number 4

J. MIKLOSKO	1 Investigation of algorithms for numerical computation of continued fractions
V.V. DITKIN	12 A modification of the Crandall-Kikuta method
B.P. IL'IN	22 Some estimates for conjugate gradient methods
A.N. DYUKALOV	31 An optimality criterion in linear dynamic optimal control problems with mixed constraints
V.G. RAMM	48 Solutions of integral games with a continuum of strategies
Yu.P. BOGLAEV	57 An iterative method for the approximate solution of singularly perturbed Volterra integral equations
V.I. LEBEDEV and S.A. FINOGENOV	70 Utilization of ordered Chebyshev parameters in iterative methods

I.V. FRYAZINOV	83	Economic difference schemes for the two-dimensional equation of heat conduction with mixed derivatives
A.V. BAEV and V.B. GLASKO	96	On solution of the converse kinematic problem of seismics by means of a regularizing algorithm
G.V. GUSHCHIN and L.G. GUSHCHINA	106	Some regularizing algorithms and their use in the oil pool prospecting problem
V.P. VARAVA, E.I. ERSHOV and R.P. TARASOV	118	An equation for the paths in light guides with variable refractive index
T.S. IVANOVA	131	A method for solving the problem of the magnetohydrodynamic dynamo
A.D. GADZHIEV	145	The $T_L$ method of solving the two-dimensional non-stationary neutron transport equation
G.A. TYURIN	155	Convergence of the orthogonal polynomial method of solving the single-velocity neutron transport equation
G.M. KOBEL'KOV	165	Solution of the rigid contact problem for an incompressible substance
V.Ya. TERESHCHENKO	174	Generalization of Trefftz's method for three-dimensional problems of elasticity theory
A.F. VOEVODIN, L.Ya. ESIPOVICH and V.R. KOGAN	184	A difference method of computing non-stationary one-dimensional gas flows
A.A. GUBAIDULLIN and A.I. IVANDAEV	196	Use of a modified large-particle method for solving problems of wave dynamics
Yu.P. BABILOV	206	Two families of precedence grammars
Short Communications		
J.K. BAKSALARY, A. DOBEK and R. KALA	216	A method for computing projectors
M.K. SAMARIN	219	Some properties of inverse mappings
Yu.I. KHUDAK	224	A method of regularizing operator equations in Banach spaces
L.T. ASHCHEPKOV and G.N. KONSTANTINOV	227	The effect of "cutting" junctions in non-linear programming problems
G.A. OSOSKOV	234	A rapid method of obtaining a random sequence with a Poisson distribution
V.S. SUSHKOV	236	The simulation of random processes in Monte-Carlo problems
V.I. UL'YANOVA	240	The transfer of inhomogeneous boundary conditions and the calculation of eigenfunctions
WANG DAN-JI	242	Numerical study of stability with permanent disturbances

S.M. TSIDILIN	249	A numerical method of solving boundary value problems for a system of Hamiltonian equations
M.V. FEDORYUK	250	The active damping of the oscillations of elastic media
A.I. VASKIN	254	An approximate method of solving the Lippmann-Schwinger equation
E.V. EGIАЗARYAN	258	A class of systems of Boolean equations
	264	Book Reviews

## Number 5

N.B. ZYABREV and T.I. SAVELOVA	1	Estimation of the rate of convergence of regularized solutions of an equation of the convolution type with errors in the kernel and right-hand side
V.V. DITKIN	12	Approximate evaluation of eigenvalues lying in an isolated part of the complex plane
N.D. SERGEEV	19	Minimization of the number of arithmetic operations in problems with sparse symmetric matrices
O.R. MEN'SHIKOVA	30	Evaluation of a generalised nucleolus
T.N. DANIL'CHENKO	45	Mixed strategies in two-person positional games with information exchange
N.D. ASTAKHOV	55	Algorithms of feasible directions for solving certain problems of the transport type
A.E. POLICHKA and P.E. SOBOLEVSKII	65	New $L_p$ estimates for parabolic difference problems
A.B. KUCHEROV and E.S. NIKOLAEV	74	A transverse triangular iterative method for solving mesh elliptic equations in a rectangle
A.L. TSANARIN	86	A necessary condition for the stability of multi-dimensional finite difference boundary value problems
A.I. TOLSTYKH	92	Implicit difference schemes of the third order of accuracy for multi-dimensional problems
V.I. TELEGIN	101	A difference scheme for Vlasov's equation
O.P. KOMURDZHISHVILI	107	A difference scheme for solving the second boundary value problem for a version of the equations of the theory of shells
I.I. KUDISH and V.A. RYKOV	118	Convergence to the centre and reflection of a spherical wave in a gas
V.F. BAKLANOVSKAYA and I.I. CHECHEL'	125	A numerical method for solving St. Venent's equations (chamber model)
L.K. MARTINSON	141	The finite velocity of propagation of thermal perturbations in media with constant thermal conductivity

O.B. POPOV	149	Galerkin's method in problems of diffraction at smooth wave-like surfaces
A.I. KHISAMUTDINOV	159	A bounded variance estimator for computing by the Monte Carlo method the flux of particles at a point
B.S. ELEPOV and G.A. MIKHAILOV	170	Monte Carlo methods for estimating the correlation function of strong fluctuations of light in a turbulent medium
S.L. ZIMONT and N.Ya. MAR'YASHKIN	181	Convergence and accuracy of the computation of two-centred molecular integrals by means of Mayer $G$ -functions
L.I. STANEVICHENE	189	An algorithm for constructing bounded-context parsers
A.L. FUKSMAN	198	Weakly separated grammars
P.P. KOLTISOV	210	Simulation of pattern recognition systems with time constraints
L.N. VOLOVIK and B.Ya. SKACHEK	221	A modification of the algorithm for solving the travelling salesman problem
		<b>Short Communications</b>
Yu.F. ADAMOVICH and M.L. KARAKULIN	231	A general approach to vector-root separation and a method of determining all the vector-roots of a system of non-linear algebraic equations
I.M. SOBOL	236	Uniformly distributed sequences with an additional uniform property
V.A. KUZ'MENKOV	242	The existence of cubature formulas with the least possible number of nodes
E.G. SHIFRIN and G.V. SHUBNIKOV	245	Approximation of Neumann's boundary condition on a rectangular spatial grid with an error $O(b^2)$
B.S. METEV	249	An approximate method for the preliminary processing of the opinions of experts
M.D. IVANCHEV	254	A class of quadratic assignment problems
A.N. ZHERNAK	260	A group of algorithms for solving quasilinear problems of integer programming
I.E. TSUKERNIKOV	267	Numerical solution of the exterior Dirichlet problem by means of an integral equation of the first kind
	274	Book Reviews

### Number 6

E.S. NIKOLAEV	1	Non-linear acceleration of two-layer iterative methods of the variational type
B.N. PSHENICHNYI and N.N. REDKOVSKI	8	A numerical method of minimization not involving the evaluation of derivatives

A.B. BAKUSHINSKII	16	A regularizing algorithm based on the Newton-Kantorovich method for solving variational inequalities
M.Yu. BORODOVSKII	23	Numerical solution of some problems of statistically optimal pulse control synthesis
Dzh.A. BABAEV	32	The method of hyperspheres for solving problems of Boolean programming
S.A. ORLOVSKII	44	Games in fuzzy conditions
V.V. ROZEN	52	Mixed extensions of games with ordered outcomes
D.A. MOLODTSOV	67	The solution of a class of non-antagonistic games
A.A. VASIN	73	The set of attainable vectors in a repetitive game without side payments
V.V. POSPELOV	83	Adam's methods with an unstable operator
L.I. KAMYNNIN	96	Uniqueness of the solution of a boundary value problem with Samarskii boundary conditions for a second-order parabolic equation
N.N. KUZNETSOV	105	Accuracy of some approximate methods for computing the weak solutions of a first-order quasi-linear equation
Yu.P. POPOV and A.A. SAMARSKII	120	Numerical methods of solving one-dimensional non-stationary gas-dynamic problems
N.A. TIKHONOV	137	The stability of a solution of the non-linear wave equation
E.S. BIRGER, L.A. VAINSHTEIN and N.B. KONYUKHOVA	143	Diffraction of a wave bunch on a plasma cylinder
R.P. TARASOV	155	Beam equations for randomly curved cylinders with a refractive index that varies over the cross-section and some cases of their integration
Yu.I. ZHURAVLEV and A.F. MUKHAMEDGALIEV	166	Information coding with optimal prediction accuracy
V.V. RYAZANOV	173	Optimization of algorithms for calculating estimate with respect to parameters characterizing the representability of the standard rows
S.A. YAKOVLEV	185	The asymptotic properties of a class of recognition algorithms
<b>Short Communications</b>		
V.N. KUBLANOVSKAYA	192	The solution of linear algebraic systems
V.A. MOROZOV	194	Numerical realization of the optimal discrepancy method
Yu.P. PY'TEV	198	The correctness of a linear estimation problem

I.I. TUGOV and Yu.L. SHITIKOV	202 A method of calculating the Appell functions $F_1(\alpha; \beta, \beta'; \gamma, x, y)$
E.I. VOLYNSKII and M.Z. KHENKIN	206 Non-linear subsidiary problems in mathematical programming
V.M. BORISOV and I.E. MIKHAILOV	211 The optimal distribution of material in twisted rods
A.V. GUBAREV and V.V. LEBEDEV	214 <i>Numerical solution of multidimensional optimal control problems</i>
D.S. FILIPPYCHEV and B.N. CHETVERUSHKIN	218 A method of averaging equations of the diffusion type over the photon energies
A.D. GADZHIEV and O.S. SHIROKOVSKAYA	222 Numerical solution of the two-dimensional transfer equation in curvilinear coordinates
A.M. ANTONOV and Yu.A. BELOV	227 Asymptotic study of the blowhard problem for the supersonic flow of a gas past sharp slender bodies
	233 Book Reviews
	241 Academician A.N. Tikhonov celebrates his Seventieth Birthday
